**Compiled by: June Jenkins and Lucinda Mejdell-Awbrey**

## **Introduction**

Educators who implement the Olweus Bullying Prevention Program (OBPP), or who are considering doing so, frequently ask if the OBPP supports Common Core Standards. The Common Core is a set of academic standards in mathematics and English language arts/literacy (ELA). These learning goals outline what a student should know and be able to do by the end of each grade ([www.corestandards.org](http://www.corestandards.org)). Below are examples of OBPP materials that meet Common Core Standards. This is not an exhaustive list but is intended to: (a) illustrate the many connections between Common Core Standards and the OBPP, and (b) help educators identify OBPP sources that meet each standard.

For more information about the OBPP, visit: [www.violencepreventionworks.org](http://www.violencepreventionworks.org) or [www.clemson.edu/olweus](http://www.clemson.edu/olweus).

### Common Core State Standards for Mathematics

#### Measurement and Data (5.MD)

Standard	Source(s)
<b>Represent and interpret data.</b>	
5.MD 2: Make a line plot to display a data set of measurements in fractions of a unit ( $\frac{1}{2}$ , $\frac{1}{4}$ , $\frac{1}{8}$ ). Use operations on fractions for this grade to solve problems involving information presented in line plots. For example, given different measurements of liquid in identical beakers, find the amount of liquid each beaker would contain if the total amount in all the beakers were redistributed equally.	<i>Class Meetings That Matter (K-5)</i> , pp. 174, 211, 252, 261, 296

#### Geometry (5.G)

Standard	Source(s)
<b>Graph points on the coordinate plane to solve real-world and mathematical problems</b>	
5.G 1: Use a pair of perpendicular number lines, called axes, to define a coordinate system, with the intersection of the lines (the origin) arranged to coincide with the on each line and a given point in the plane located by using an ordered pair of numbers, called its coordinates. Understand that the first number indicates how far to travel from the origin in the direction of one axis, and the second number indicates how far to travel in the direction of the second axis, with the convention that the names of the two axes and the coordinates correspond (e.g., x-axis and x-coordinate, y-axis and y-coordinate).	<i>Class Meetings That Matter (K-5)</i> , pp. 174, 211, 236, 252

5.G 2: Represent real world and mathematical problems by graphing points in the first quadrant of the coordinate plane, and interpret coordinate values of points in the context of the situation
